
About Us...

Mapmakers Alaska provides hard copy maps and complete GIS projects of active and historic exploration and development areas for the Alaska oil and gas industry.

Lease, well, unit, facilities, land status and lease sale data with tract-specific mitigation stipulations and drilling incentives, set on top of comprehensive base maps, have become the standard for Alaska oil & gas.

Our custom maps, on paper or in digital format, are proven and convincing exhibits in board rooms, "war" rooms and court rooms. Numerous publications for environmental, historic and scientific assessments have enhanced their content with our maps and graphics.

Maps and GIS data for the oil and gas industry in Alaska.

Maps and GIS data for the oil and gas industry in Alaska

GIS-Alaska Oil & Gas[©]

is an efficient means to keep your company current on the ever-changing lease and well activities. Your annual subscription that includes a combination of project files and hard-copy maps - for any regional or all of the active areas in Alaska—keeps you on track with your peers and ahead of the competition.

Subscriptions include quarterly and incremental monthly updates, depending on industry activity, periodic activity maps, files and graphics for both ArcView/ArcMap and AutoCAD Map. We provide technical support free of charge and training sessions by appointment.

Mapmakers Alaska is always open to comments, questions and suggestions regarding the contents and presentation of our products and services.

We look forward to providing you with the maps and information you need!
